

***MISSISSIPPI VALLEY UNIFORM REGIONAL
BARLEY NURSERY***

2007

FOR OFFICIAL USE ONLY

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
NORTHERN PLAINS AREA
AND
COOPERATING STATE AGRICULTURAL EXPERIMENT STATIONS

MISSISSIPPI VALLEY UNIFORM REGIONAL BARLEY NURSERY 2007

Compiled by Michael C. Edwards

This is a joint progress report of cooperative investigations underway in the State Agricultural Experiment Stations and the Agricultural Research Service of the United States Department of Agriculture containing preliminary data that have not been sufficiently confirmed to justify general release; interpretations may be modified with additional experimentation. Confirmed results will be published through established channels. The report is primarily a tool for use of cooperators and their official staffs and to those persons having direct and special interest in the development of agricultural research programs.

This report includes data furnished by the State Agricultural Experiment Stations, the provinces of Manitoba and Saskatchewan, Agriculture and Agri-Food Canada, and the Agricultural Research Service, and was compiled in the USDA-ARS Cereal Crops Research Unit at North Dakota State University. The report is not intended for publication and should not be referred to in literature citations nor quoted in publicity or advertising. Use of the data may be granted for certain purposes upon written request to the agency or agencies involved.

ACKNOWLEDGEMENT: Dr. James Hammond [Department of Plant Sciences, North Dakota State University] developed the computer program used to evaluate and compile the data for most of this report.

List of Stations and Cooperators

2007 Mississippi Valley Uniform Regional Barley Nursery

<u>Stations</u>	<u>Cooperators</u>
Aberdeen, Idaho	Don Obert, D. Burrup, Chris Evans, USDA, Agricultural Research Service
Ames, Iowa	Lance Gibson, Ron Skrdla
Brandon, Manitoba	M. C. Therrien, Agriculture Canada
Winnipeg, Manitoba	J. Gilbert, T. Fetch, A. Tekauz, Agriculture Canada
Caro, Michigan	R. D. Freed, Michigan State University
Crookston, Minnesota	Kevin Smith, University of Minnesota
Morris, Minnesota	Kevin Smith, University of Minnesota
Bottineau, North Dakota	D.B. Cooper, S. Askelson, C. Allen, Busch Agricultural Resources
Sidney, Montana	D.B. Cooper, S. Askelson, C. Allen, Busch Agricultural Resources
Carrington, North Dakota	R. D. Horsley, North Dakota State University
Fargo, North Dakota	R. D. Horsley, North Dakota State University
Osnabrock, North Dakota	R. D. Horsley, North Dakota State University
Saskatoon, Saskatchewan	Bryan Rossnagel, B. L. Harvey, Tom Zatorski University of Saskatchewan
Madison, Wisconsin	H. Kaepler, J. Mochon, University of Wisconsin

2007 Mississippi Valley Barley Nursery

Summary

Nine locations contributed useable data for this year's report. The reader is referred to the "Nursery Conditions" section immediately following this summary for other comments concerning specific locations.

Average planting date was May 3rd, 6 days later than the 30-year average, while average heading date was only one day later than the average. The average planting date was nine days later than last year. Heading date (June 26th) was six days later than last year.

Average yield (4655 kg/ha or 86.5 bu/a) was above the 30-year average, but well below the 30 year high of 2004 and also below last year's average. Entries with the best yields were M133, 2ND21867, 6B03-4478, M124, and SR417.

Five stations reported test weight; the average of 61.1 kg/hl was lower than that of last year and not far from the 30 year average (60.9). The greatest test weights were recorded for 2ND22182, Pinnacle, 2ND21867, Conlon, and M133.

Lodging data were reported from three locations, Bottineau, Carrington, and Osnabrock. The entries with the least lodging were 2ND22182, 2ND21867, Pinnacle, ND20666, and ND20448. Average plant height was 79.1 cm – less than the 30 year average, but not as short as last year. Shortest entries were ND22421, 2ND22182, 2ND21867, ND20666, and SR410.

Kernel plumpness data were reported from Kernen, Brandon, and Sidney. Please refer to Table 18 for further information.

Disease data from the Cereal Research Centre in Winnipeg are posted in Table 19 (net blotch, scald, spot blotch).

NURSERY CONDITIONS

IOWA:

AMES: Previous crop: .
Soil type: .
Fertilizer
Available:
Added:
Remarks: The nursery was planted in mid April. Cold weather after planting delayed germination with warmer weather in May and June hastening plant growth. This along with dry weather in June reduced yields. Test weights were near normal. Disease was not a problem this year. No lodging.

MANITOBA:

BRANDON: Previous crop: Summer fallow with compost incorporation
Soil type: Pipestone clay, heavy textured
Fertilizer
available:
added:
Remarks: 90 lbs/a N; 50 lbs/a P; >300 lbs/a K.
20 lbs/a P
Herbicides added: Refine Extra and Lontrel at recommended rates.

MICHIGAN:

CARO: Previous crop: .
Soil type: .
Fertilizer
available:
added:
Remarks: .

MINNESOTA:

CROOKSTON: Previous crop: soybeans
Soil type: Wheatville, silt-loam.
Fertilizer
available:
added:
Remarks: 25 lbs/a N; 16 lbs/a P; 362 lbs/a K.
100 lbs 46-0-0.
The nursery had very favorable growing conditions from planting through harvest and no lodging occurred.

MORRIS: Previous crop: soybeans.
Soil type: Nutley clay.
Fertilizer
available:
added:
Remarks: lbs/a N; lbs/a P; lbs/a K.
broadcasted 30 lbs. N/a urea.
The nursery had very favorable planting and early growing conditions. Then May thru August it was very dry. No lodging occurred this year.

NORTH DAKOTA:

CARRINGTON: Previous crop: soybeans.
Soil type: Heimdahl loam, sandy loam

	Fertilizer available: added: Remarks:	57 lbs/a N; 16 lbs/a P; 270 lbs/a K 75 lbs/a N Planting moisture was adequate this spring. Crop emergence was excellent. Lodging and stem breakage were noted at this location. Temperatures were extremely hot during heading. Yields were slightly higher than average for this location.
FARGO:	Previous crop: Soil type: Fertilizer available: added: Remarks:	soybeans Fargo, silty clay loam 24 lbs/a N; 12 lbs/a P; 425 lbs/a K 85 lbs/a N; 1 lbs/a P. Planting moisture was adequate for the Fargo nursery. This site was inundated with water in June and never fully recovered. Trial was abandoned due to water damage.
OSNABROCK:	Previous crop: Soil type: Fertilizer available: added: Remarks:	soybean Barnes-Svea loam, loam. 18 lbs/a N; 15 lbs/a P; 1 lbs/a K. 80 lbs/a N; 1 lbs/a P; 1 lbs/a K. Planting date was about average for this location. Soil moisture at planting was adequate. Crop emergence was excellent. Lodging was noted at this location. Yields were about average for this location.
BOTTINEAU:	Previous crop: Soil type: Fertilizer available: added: Remarks:	canola. The nursery was seeded into a good seedbed with adequate moisture. The summer progressed normally during the growing season and nursery had excellent plant development. Harvest went well with good yields and acceptable statistics. The seed is stained due to some lodging and rain storms during harvest.
SIDNEY (MT):	Previous crop: Soil type: Fertilizer available: added: Remarks:	Sugarbeets. The nursery was seeded into a good seedbed with adequate moisture. During the summer the nursery progressed normally with very little lodging or disease pressure. Harvest went well with dry conditions, good yields, and acceptable statistics. Nursery was sprinkler-irrigated.
WISCONSIN:		
MADISON:	Previous crop: Soil type:	soybeans St. Charles, loam

Fertilizer
available: .
added: none
Remarks: Nursery lost.

SASKATCHEWAN:

KERNEN: Previous crop: .
Soil type: .
Fertilizer
available: .
added: .
Remarks: Buctril M applied at 2-4 leaf stage.
